Reasons for Allowance

1. Claims 11-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious all the limitations in independent claim 11. Specifically the combination of an electronic memory component comprising:

a receiving substrate, wherein the receiving substrate is doped;

a memory cell matrix embedded in the receiving substrate;

a top/protective substrate to at least partially surround the receiving substrate on at least one side of the receiving substrate remote from the memory cell matrix, wherein the top/protective substrate is doped opposite to the receiving substrate; and

a circuit arrangement in contact with at least one substrate of the receiving substrate and the top/protective substrate for detection of a voltage or a current from the at least one substrate of the receiving substrate and the top/protective substrate, other than from a dedicated light sensor circuit component, in response to generation of charge carriers in the at least one substrate upon light incidence on the electronic memory component.

3. The following patents and published patent applications are cited to further show the status of the art with respect to similar memory devices and their associated light attack detection/protection features, or lack there of.

Brahmbhatt (US Patent 5,341,342)

Wong (US Patent 5,867,425)

Chi (US Patent 6,025,625)

Wang et al. (US Patent 6,330,190)

McPartland et al. (US Patent 6,512,700)

Gamperl et al. (US PGPub 2005/0036383)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
